

# Improve Patient Outcomes. Prevent Harm. Respond Faster.

## Alairo Solutions: Safer and Smarter Care

### Why Choose Alairo?

#### 1. Active Fall Prevention

- ✓ Detects impending bed or chair exits in milliseconds, delivering direct video feed to the nurse's phone
- ✓ Reduces need for 1:1 observation staffing and provides forensic-level post-fall reporting
- ✓ Respects patient privacy with real-time image anonymization
- ✓ AI-trained by 10,000 bed exits, prevents false positives

#### 2. AMP - Alairo's Mobile Platform

- ✓ Calls are sent as a text with a specific tone, instead of a call
- ✓ Color-coded messages match corridor lights for faster recognition
- ✓ One-button calls into room for patient satisfaction
- ✓ Call log shows active calls, alarm duration, and alarm history

#### 3. Insights - The Analytics Engine

- ✓ Transforms raw data into actionable insights.
- ✓ Supports Quiet at Night, HCAHPS, and patient experience initiatives.
- ✓ Tracks alarm load, fall risk, staff responsiveness, and alarm fatigue trends.
- ✓ Provides improvement insights for leadership and teams.

**49%**<sup>1</sup>

of sentinel events are due to falls.

**75%**<sup>2</sup>

of alarms are false or self-correcting.

**\$14,665**<sup>3</sup>

additional hospital cost per inpatient fall.
